Hurlstone Agricultural High School is a selective, co-educational day/boarding school with exceptional academic results. Located on a 112 hectare campus, the sporting facilities and student accommodation are nestled within the heart of an operational farm. The boarding school is home for students during their time in Australia. It is an outstanding facility for students to expand and enhance their educational opportunities. It brings city and country students together in a rural environment, only 40 minutes from the centre of Sydney.

Facilities include individual rooms or bunk style accommodation. Registered nursing staff and a welfare team are available during the study tour. Students have direct access to the dining room, swimming pool, common rooms, games room, cinema, sports field, tennis courts,

About Hurlstone Agricultural High School

Farm Enterprises

The farm enterprises include dairy cattle, beef cattle, pigs, goats, poultry, and sheep, as well as vegetables, orchards, horticulture, crops, pastures and Agro-forest.

The Dairy has a milking herd of 45-50 cows and approximately 60 heifers, dry cows and calves. Breeds are predominantly Ayrshire and Jersey. The herds average milk production is 920L/day.

On the sheep front, there is a stud of Poll Dorsets and some Merinos for the students to look after. Students and staff are also in the process of breeding a herd of boer goats.

In the piggery, pregnant sows farrow over a period of several months, with piglets being sold as porkers or baconers, depending on demand at the local market.

There is a commercial poultry operation consisting of around 200 birds that supply eggs while a purebred poultry flock is also kept.

Lastly there is a horticulture unit consisting of shade houses that produce plants for sale and that allow students to become involved in propagation techniques and hydroponics. A bee keeping enterprise is also in operation.
